

**Know what
you're
drinking!**

What is Hydronic?

Hydronic is a Water Generator which makes water from air. Its revolutionary technology harnesses moisture from air and converts it into drinking water. It is your very own source of clean and safe drinking water, free of contamination, supply problems and refilling hassles.

Water produced through Hydronic Water Generators (HWG) is pure, natural and untouched by contaminants that are present in conventional water supplied through pipelines or plastic bottles.

Getting water straight from the air, processing it through nano air filtration technology with a 4 stage filtration system and absolutely no contact with pipes and plastic bottles is what makes HWG the best quality.

HWG is made to last longer due to its efficient and green technology.

Hydronic Water Generators

Pure Drinking Water from Air

Certified Products

It's a Healthy Lifestyle Solution

Five Appliances in One

How Hydronic Works?

Product Technology

4 filter, advanced nano scale water purification and mineralization

Advanced aerospace technology air filter

Advanced UV light sterilization for water dispensing

Manufactured from high quality food grade materials

Advanced anti-bacterial LED lighting within water tank

Microcomputer control technology for automatic operations

Purification Standards

Air Purification 3-in-1

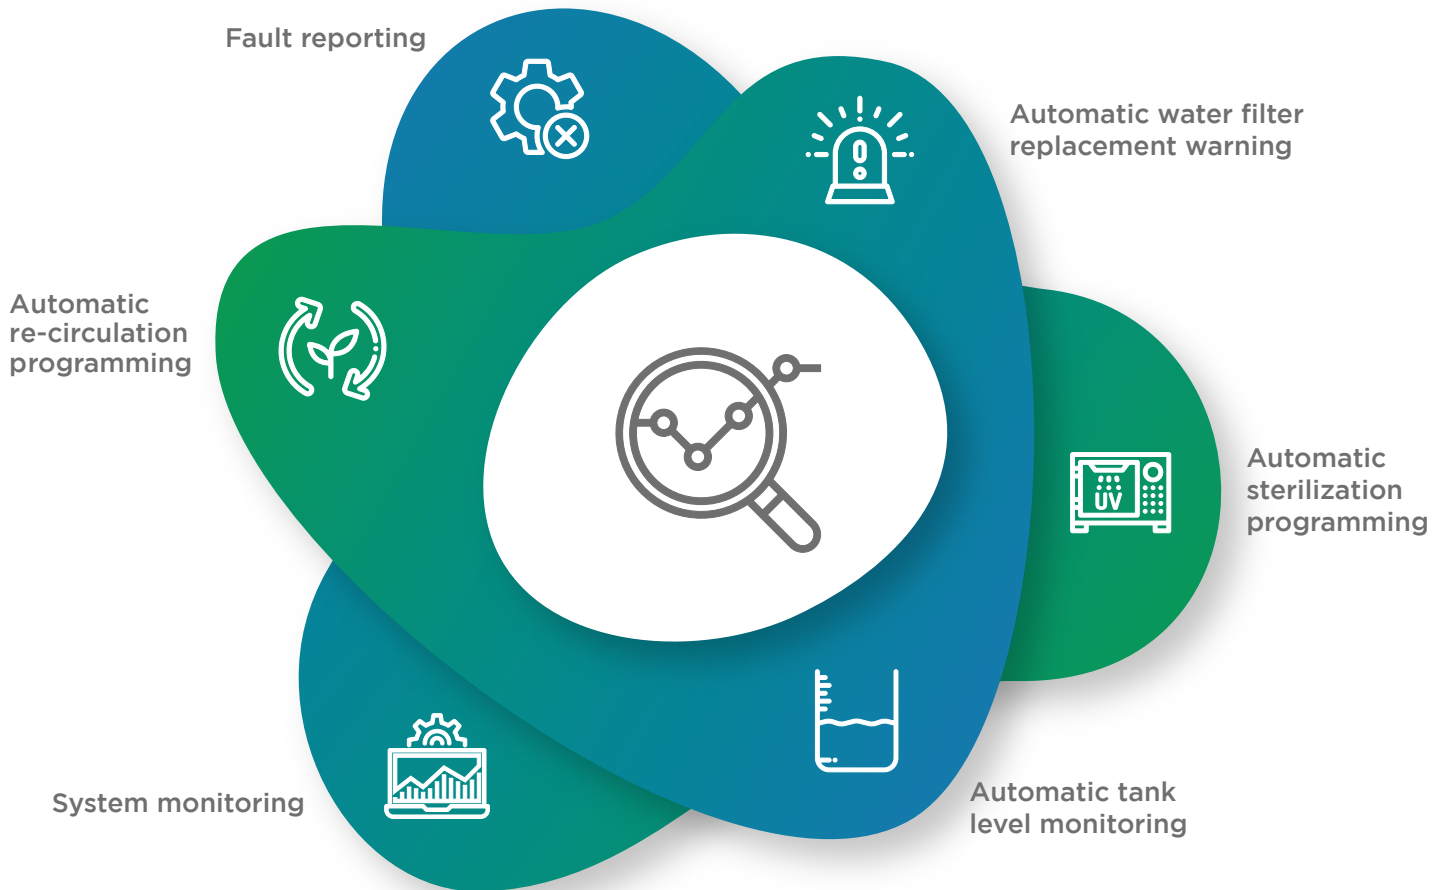

- HEPA cotton filter
- Activated carbon modified molecular sieve
- PP cotton

Water purification 4 step filtration

- M-Cell filter
- M-Ctl filter
- HWP-UF filter
- HWP-MU filter

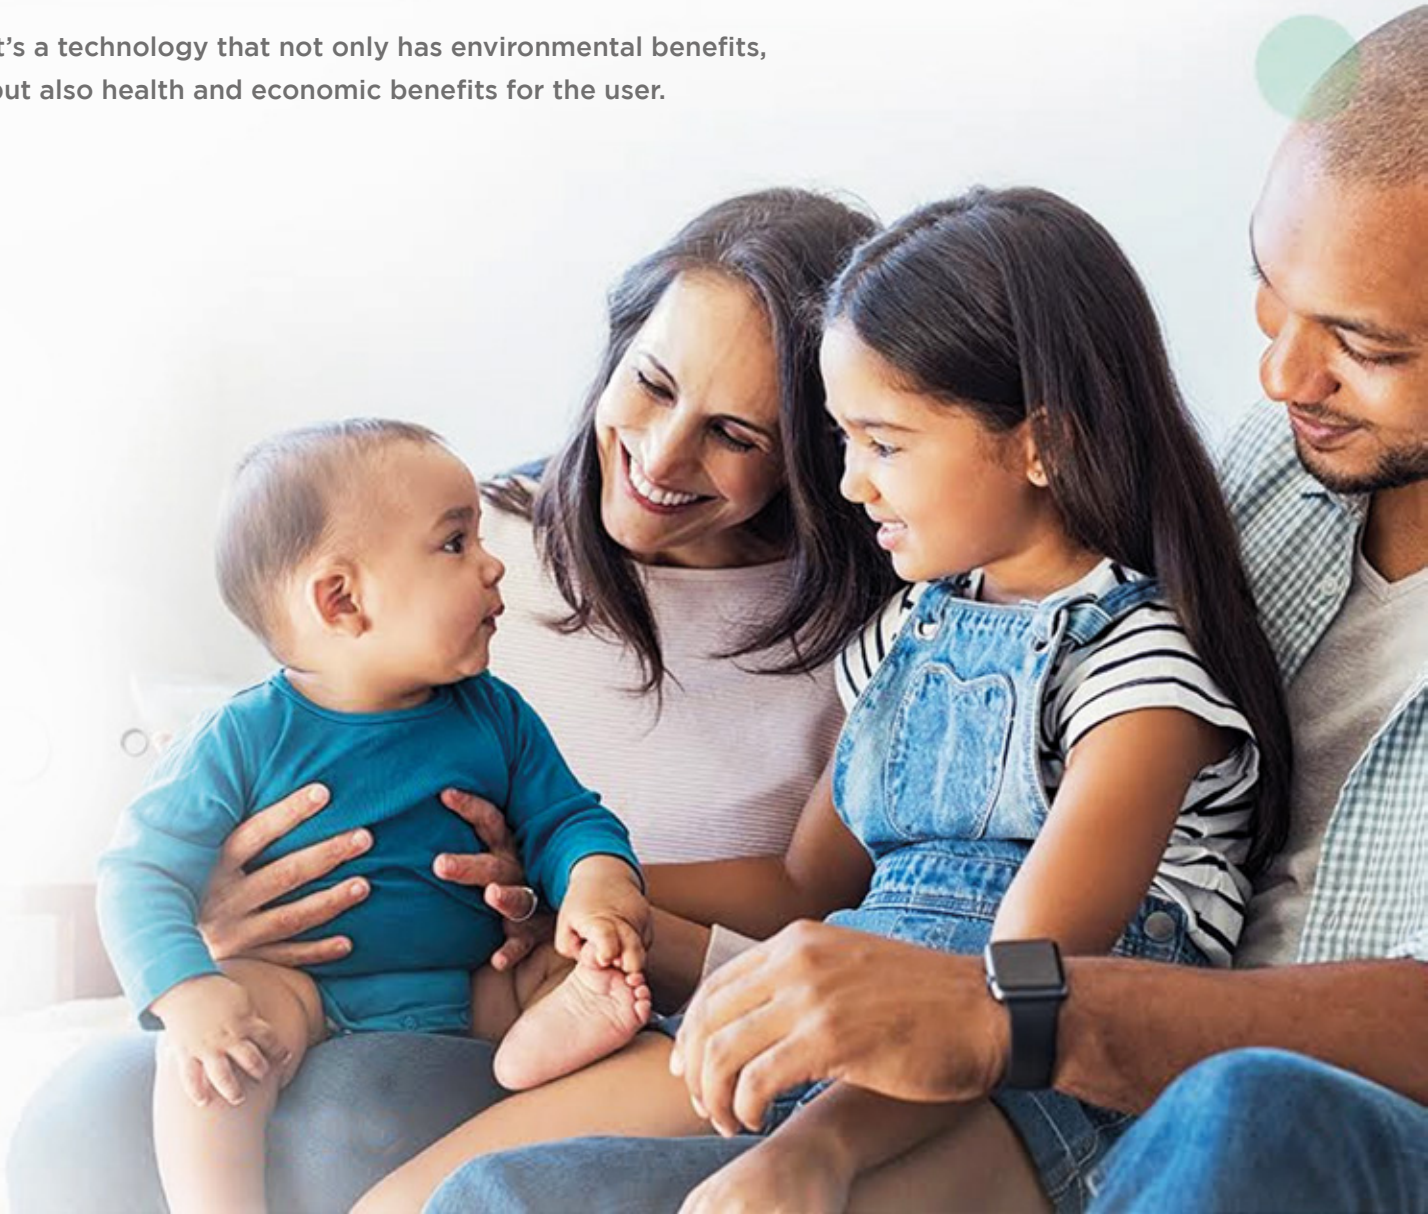

Intelligent Monitoring

Benefits

Hydronic water generators provide water as a source.
A source which is sustainable and unlimited.

It's a technology that not only has environmental benefits,
but also health and economic benefits for the user.

Our Products

HYDRO-10

The Hydro-10 produces upto 10 litres or minimum 25 glasses of clean drinking water per day.

HYDRO-20

The Hydro-20 produces upto 20 litres or minimum 60 glasses of clean drinking water per day.

Our Products

HYDRO-50

The Hydro-50 produces upto 50 litres or minimum 120 glasses of clean drinking water per day.

HYDRO-100

The Hydro-100 produces upto 100 litres or minimum 240 glasses of clean drinking water per day.

Hydronic Living

Product Warranty

All products carry a 12 month warranty, which can be extended further, supported by qualified technical after-sales service support staff.

After-Sales/Warranty

All products carry consumables like air and water filters, which are available with us in our stock. Under normal use, machines need once in a year replacement of air and water filters.
